## ABOUT

Geoff is a software engineer graduate from Ateneo de Manila University with extensive experience in JavaScript, React, CSS, HTML, and RoR.

In his stint with Air Asia, he was commended for his discipline, good work ethic, and efficient communication skills. During his pilot role, he made sure flights were efficiently completed with safety as the top priority. He was also a member of the Air Asia creatives team where he was able to utilize his creativity and out of the box thinking where it was needed.

He is an entrepreneur at heart, looking for business and investment opportunities where he can spend his time learning about asset management. His hobbies include travelling, biking, wakeboarding and golf.

## EXPERIENCE

### FREELANCE WEB DEVELOPER

#### Aspire Human Resource Solutions | 2021 - Present

- Conceptualized and developed the landing page of Aspire Human Resource Solutions which is a Headhunting company based in the Philippines. They are previously known as Principalia Inc.
- Aspire was in need of a new modern website design. Their previous website is still deployed and is still under the name Principalia Inc but featured an outdated and cluttered design. They are no longer able to contact their previous web developer and had no access to the current website's source code and documentation.
- Closely communicated with the company staff in-charge of the new landing page and suggested that we create a new website using React which will feature a modern website design and proper documentation.

### AIRBUS 320 PILOT | CREATIVES

#### Air Asia Philippines | 2017 - 2021

- Part of Air Asia's Flight Deck crew piloting their fleet of Airbus 320. Worked closely with Captains to ensure a safe flight for Air Asia passengers for both international and domestic flights.
- Checked flight plans and oversaw fueling for each flight making sure each data is accounted for adequately.
- Checked the aircraft before and after each flight to make sure everything is as it should be.
- Gave instructions to cabin crew and technicians whenever needed.

- Communicated closely with Air Traffic Controllers and Ground Controllers to ensure safe movement of the aircraft and completion of the flight.
- Piloted the Airbus 320 and completed flights both domestic and international as per standard operating procedure of Air Asia Philippines.
- Constantly trained for handling emergency procedures and situations. Took simulator exam sessions every 6 months during employment to make sure emergency procedures are on point.
- Became a member of Air Asia's creatives team during the year 2020. At this time, the Air Asia Creatives team was lacking in manpower and needed help in creating digital advertisements for their social media presence. I became a member, conceptualized and developed digital advertisements which was utilized in Air Asia's social media presence. Made use of Adobe Photoshop, Adobe Premiere and other applications needed to create effective digital advertisements for Air Asia.

## TEST ANALYST

### Macquarie Group Limited | 2013 - 2014

- Created and Executed Test Cases for the different financial software that Macquarie Group Limited - Corporate Operations Group Philippines utilized for day to day operations.
- Worked closely with Macquarie's business analysts and Software Developers to make sure that Macquarie's applications are adequate for the ever changing needs of the business.
- Created and gave monthly presentations to the testing team to relay changes with the Golden Source application.
- Promoted to Senior Associate Test Analyst within 1 year of employment.

## INTERN

### Chevron South East Asia (Singapore) | 2012

- Handled data mining and data consolidation for Chevron's South East Asia Planning team. The data gathered and consolidated were used for Chevron's South East Asia Retail Business plans for the year of 2012 to 2013.
- Created presentations with data gathered for the performance of Chevron's downstream retails businesses for each country in South East Asia.
- Attended seminars regarding the science and marketing behind the petroleum business.
